Village of Oblong
Attn: Mayor

Re: Aggregation Program Agreement dated February 24, 2016 (the "Original Agreement") between Village of Oblong ("Municipality") and ILLINOIS POWER MARKETING COMPANY d/b/a HOMEFIELD ENERGY ("Supplier")

Dear Mayor:

This Amendment Letter is to extend the current Agreement at reduced rates. By executing this Amendment the Municipality understands that Supplier will conduct an opt-out process notifying eligible customers of the lower rate and term, along with conditions for participating in the program.

The parties to the Original Agreement acknowledge that the new rates also represent changes required for any reduction for the Renewable Portfolio Standard ("RPS") as a result of Public Act 99-0906 ("Future Energy Jobs Act a/k/a FEJA") (December 7, 2016) and shall account for the elimination of the Supplier's responsibility to charge for Illinois RPS beginning in June of 2019.

The below table will amend the current agreement by replacing the pricing table information on Exhibit A of the Original Agreement, attached hereto in its entirety, and inserting in its place the following:

The Municipality originally selected 0% Renewable Power Option with Civic Contribution Fee of \$0.001.

Retail Power Price	Delivery Term:
\$0.05700/kwh	<u>February</u> 2018 meter read date through June 2019 meter read date
\$0.05596/kwh	June 2019 meter read date through December 2020 meter read date

Except as specifically amended hereby, the Agreement shall continue in full force and effect according to its original terms.

Sincerely,

Mark Fanning
Managing Director, Retail Business Operations
